Solar Monitoring Solutions

See Cachelan at ETC 2021

As we continue to take steps to move past the pandemic, Canada's biggest renewables tradeshow is happening on **November 17-19** called the Electricity Transformation Canada (ETC). This show was developed by CanREA (formerly CanSIA) to inform the growing demand for clean energy and customized energy solutions across Canada.

We encourage all who are attending the ETC expo to drop by **booth 717** and say "Hello". Ask us any questions on how Cachelan can manage your solar portfolio or how we can help you with your monitoring needs. Cachelan provides additional full scaled solutions for (**SCADA, Building Energy Consumption, Battery Storage, Microgrid etc**). Not only that, but we provide services for:

- Managing your entire fleet of sites on one-page.
- Educational content for schools.
- Lobby display to showcase data of your energy system in the lobby of your building.
- Easy access to historical data at your convenience

Don't have a ticket for the show? Not an issue – Cachelan has a limited number of tickets to provide access to the expo floor for **November 19th**. Please contact us if you are interested.
